**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-6, drawn to method of programming a multi-level flash memory using a sensing circuit, classified in class 365, subclass 185.03.
- II. Claim 7-13, drawn to method of reading a multi-level flash memory, classified in class 365, subclass 185.03.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions is, in invention I, it relates to programming operation of a multi-level flash memory, whereas in invention II, it relates to reading operation of a multi-level flash memory.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
